## **DYNA-BLUE® Racing** **less wear- less** **friction- better** **performance**

**Crankshafts, Camshafts, Lifters, Push Rods, Rocker Arms,  
Transmission Gears, Rear End Ring & Pinion, Front Steering  
Spindles, and more last longer and win races!!!!!!**

### **Features:**

- High wear & corrosion resistance 75+ HRC
- Lower co-efficient of friction.
- Increases thermal fatigue resistance.
- Will not flake or chip like a coating.
- Increases RPM's
- Engine components will last 2-10 times longer.
- Fluidized Bed ensures uniform case on O.D as well as I.D.
- 1-2 day turnaround

*"DYNA-BLUE® is a low temperature Ferritic Nitrocarburizing diffusion process with a blue oxide layer to maximize metallurgical properties of the steel."*
