

DYNA-BLUE®

Why Titanium Nitride? Dyna-Blue® costs less and lasts 2-3 times longer

In test after test, cutting tools treated with Dyna-Blue® consistently produce more pieces than TiN. Case studies prove Dyna-Blue retains sharp cutting edges longer, does not require recoating after resharping, increases lubricity and anti-galling properties, and provides 70+ EQ RC surface hardness. Overnight service is available in most areas. Contact Dynamic today.
